

VAIBHAV SATPUTE

Java Full Stack Developer

+91-9172548359 | vaibhav.satpute2494@gmail.com | linkedin.com/in/vaibhav-satpute-524334254 | github.com/Vaibhav-S551

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building secure, scalable RESTful services using Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, and JWT, backed by SQL/NoSQL fundamentals across MySQL, PostgreSQL, MongoDB, and Redis. Proficient across the full stack, from React.js and Tailwind CSS frontends to Spring Boot and Flask backends, with working knowledge of microservices, Kafka, CI/CD (Git, Maven, Docker), and AWS. Delivered an AI-powered legacy code modernization platform and four independent full-stack applications, applying layered architecture, role-based access control, and automated testing.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Spring Boot, Spring Data JPA, Spring Security, JWT, Hibernate, Node.js, Flask, Microservices, REST APIs, Kafka

Databases: MySQL, PostgreSQL, Oracle, MongoDB, Redis

Tools & Cloud: Git, Maven, Docker, AWS, Postman, JUnit, CI/CD

AI-Assisted Development: Gemini AI, ChatGPT, Claude, Cursor

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

Punyashlok Ahilyadevi Holkar University, Solapur | CGPA: 8.54/10.0 (Grade: A+) | July 2025

PROFESSIONAL EXPERIENCE

Java Full Stack Development Trainee, Qspider

January 2025 – July 2025 | Final-Year Internship

- Developed and deployed enterprise-style REST APIs using Java and Spring Boot, following layered architecture and DTO-based request validation.
- Wrote JUnit test suites covering the majority of backend service code, catching regressions before code review and reducing manual QA effort.
- Optimized SQL queries and Hibernate entity mappings, and set up Maven/Git-based build pipelines to streamline deployment from local build to release.

Frontend Developer Intern, Zidio Development

March 2024 – June 2024 | Third-Year Internship

- Built responsive, pixel-accurate UIs in React.js from Figma wireframes, reducing design-to-development rework cycles.
- Implemented component-level state management with the team and debugged REST API integrations using Postman to catch defects before release.

PROJECTS

LegacyLens – AI-Powered Legacy Java Modernization Platform

github.com/Vaibhav-S551/AI-code-modernization-system.git

React, Vite, Spring Boot, Spring Security, JWT, Spring Data JPA, PostgreSQL, JavaParser, JasperReports, Gemini AI

- Built a full-stack platform where engineers upload legacy Java codebases and run automated scans for code quality, technical debt, and modernization risk from a centralized dashboard.
- Applied JavaParser for static analysis of legacy source code and integrated Gemini AI to generate context-aware modernization recommendations tied to specific files and lines.
- Engineered a secure Spring Boot REST API with JWT authentication and Spring Security authorization, backed by PostgreSQL and Spring Data JPA, and used JasperReports to export downloadable PDF analysis reports.

TaskBoard – Full Stack Task Management Platform

github.com/Vaibhav-S551/taskboard

Java, Spring Boot, Spring Data JPA, React.js, MySQL, Spring Security, JWT, Hibernate

- Built a Kanban-based task management platform with boards, lists, and drag-and-drop task organization, secured with JWT authentication and owner-based access control.
- Designed RESTful backend services using Spring Boot, JPA/Hibernate, and DTOs following layered architecture, paired with a React + Vite frontend integrated via Axios.

Student Management System

Java, Spring Boot, Spring Data JPA, Spring Security, JWT, MySQL/Hibernate

- Built a role-based student management system with separate admin and student dashboards for managing records, course enrollment, and attendance.
- Engineered a normalized MySQL schema with Hibernate ORM and enforced JWT-based authentication with endpoint-level access control to protect academic data.

Book Recommendation System

Python, Flask, HTML, Tailwind CSS

- Built a Flask web application that recommends books based on reading history, ratings, and preferences, using a model trained on public book-rating datasets and served via REST endpoints to a Tailwind CSS frontend.

CERTIFICATIONS

- Java Full Stack Development Certification – Qspider
- Java (Basic & Advanced) and Software Engineer Certifications – HackerRank
- 3-Star (Silver), HackerRank Problem Solving (Data Structures & Algorithms)

Languages: English (Professional Proficiency), Hindi (Native)
